

NAHR subgroup meeting with Bluespier 9th December 2014 Circle Reading Board Room

Present:

Marcus Bankes
Lauren Kerr
Rebecca Holmes
Tony Andrade
Matt Wilson
Janey Sandall (RBH admin)

- Current status
 - 2484 patients
 - 32 users
 - 48% have pre-op score
 - 36% have no emails

- Action
 - Reports need to be reviewed to show if particular sites are having problems with obtaining pre-op scores or email addresses

 - Need to know compliance rate for responders to email scores

 - Email patient at 6 weeks to say thank you for contributing to NAHR, requesting a VAS pain score only and an explanation about future scores

 - MB will get his Registrar to audit and validate his results

 - RH will circulate the current wording of patient emails for comment and in future these can be personalised with a footer note from the surgeon

- New UI
 - It was agreed to be a significant improvement
 - The concept of worklists is good but should not be the opening page
 - The icons on the left will be reversed top to bottom
 - LK explained the concepts of worklists

- The reports was demonstrated by LK and MB. This creates a filterable excel spreadsheet
- The group agreed that reports should only be viewable by the individual surgeon. RH and LK will change this setting
- The reports use .xls and uses pivot tables that do not work on Apple products.
- LK will load templates on the groups report page homepage and the group will review this on a windows computer and feedback any changes.
- Planned launch is London BHS

- New MDS
 - It was agreed one picture was sufficient
 - The online form should mirror the paper one completely.
 - Tick boxes to be removed from acetabular explanation text and this to be made smaller
 - Notes section to be removed

Next of next meeting

First week in February date tbc

- PDF Reports
 - Dates customisable
 - This will be a one-click request from the NAHR website
 - MB presented the fields that we would like populated:
 - Activity log – nos and types of operations
 - Demographic data
 - Diagnosis
 - Bar chart
 - Outcomes
 - Completion rate
 - EQ5D and IHOT 12 totals and broken down by index procedure – scores are delta changes with mean and SD.
 - MB will forward his NJR consultant level report to LK for review to try and mirror suitable areas of this.
 - Index procedures should be hip arthroscopy, open debridement, PAO
 - The group agreed soft tissue should not be included.
-
